DENR-EMB REGION VII

ENVIS Ticket Request & Account Handler Manager

Request Access User Guide

A step-by-step guide for public users submitting and tracking an ENVIS access request through the online portal.

Audience: Public requesters · **Document:** User manual · **Version:** 1.0

1. Purpose

The ENVIS Access Portal allows you to request access, a new account, or support from DENR-EMB Region VII without signing in. After you submit a request, the ENVIS team reviews it and contacts you by email. This guide explains how to submit a request and how to check its status.

What you can do

Submit an access or account request, receive a reference number, and track updates using your email address.

What you need

Your full name, a valid email address, a short subject, and a clear description of the access you need.

2. Submit a Request

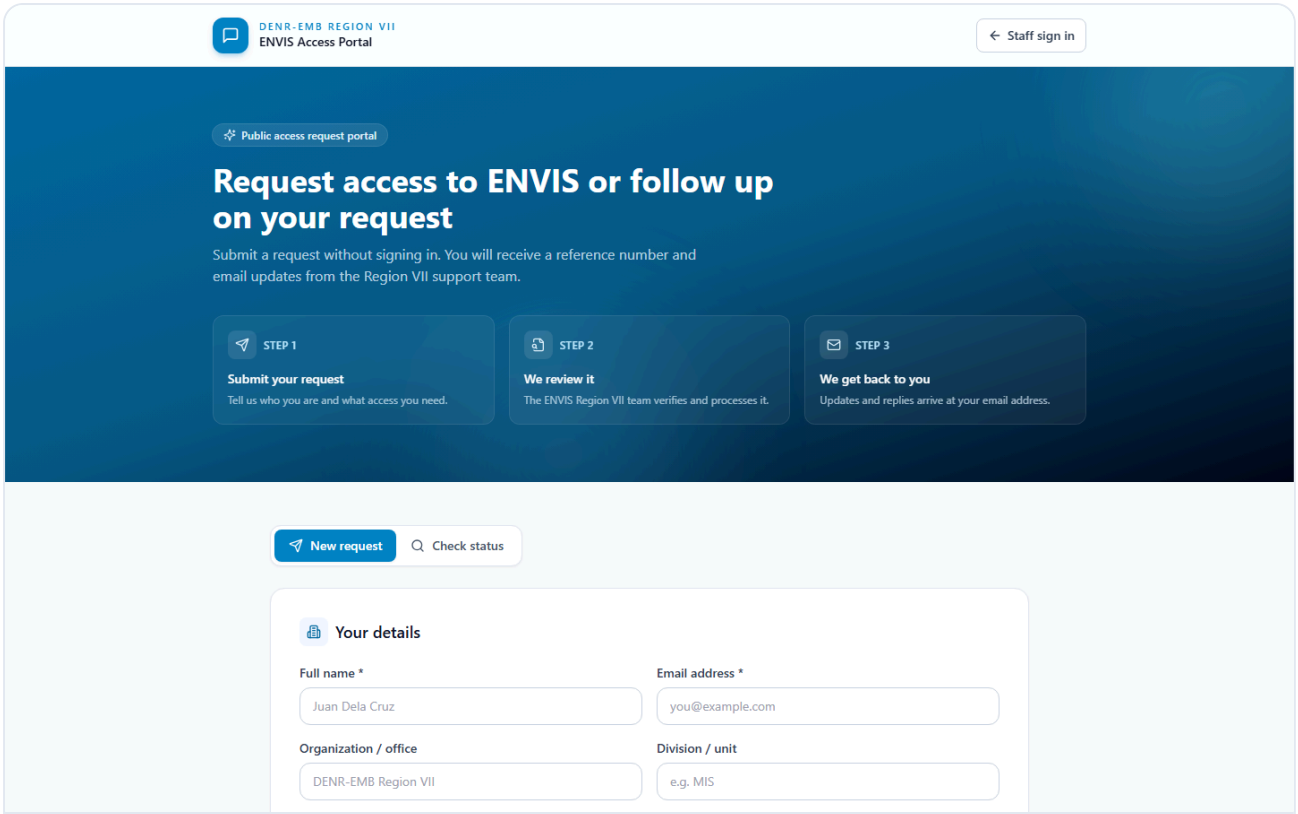

Figure 1 — The public Request Access portal (New request tab).

1. **Open the Request Access portal.** Select *New request*. No staff account or sign-in is required.

2. **Enter your details.** Provide your full name and email address (required), plus your organization/office and division/unit if applicable. Use an email address you can access — confirmations and replies will be sent there.

3. **Describe the access you need.** Choose the requested access/role and request type, then enter a clear subject and message. Include enough detail for the team to verify and process your request (e.g., your role, reason for access, or the specific module/system you need).

4. **Submit the form.** Review your information and click *Submit request*. Required fields must be completed before submission.

5. **Save your reference number.** After a successful submission, the portal displays a reference number (for example, `REQ-YYYYMMDD-####`). Keep this number — you will need it together with your email address to check the status of your request.

> **Confirmation:** A confirmation is sent to the email address you provided (if email delivery is configured). If you do not see it, check your spam or junk folder.

3. Check Request Status

You can follow up on a request at any time using the **Check status** tab in the same portal.

1. **Open Check status.** Switch from *New request* to *Check status*.
2. **Enter your reference number and email.** Use the exact reference number you received and the same email address used when submitting the request.
3. **Review updates.** The portal shows the current status and any public updates or replies from the ENVIS team.

Request status meanings

Status	Meaning
New	Your request was received and is waiting for review.
In Review	A handler is reviewing and validating your request.
Contacted	The team has reached out or replied; check your email and the updates thread.
Approved	Your request was approved. Account or access details will be provided as instructed.
Rejected	Your request was not approved. Review the message for the reason or next steps.
Closed	The request has been completed and no further action is pending.

4. Tips and Reminders

- **Keep your reference number.** Treat it like a tracking number for your request.
- **Use the same email address** when checking status that you used to submit the request.
- **Be specific.** Clear subjects and detailed messages help the team process requests faster.
- **Protect your information.** Do not share passwords or sensitive credentials in the request message. If credentials are issued, follow the instructions provided by the ENVIS team and change them on first sign-in.

> **Note:** Submissions are rate-limited to prevent abuse. If you see a message asking you to try again later, wait a few minutes before resubmitting.
